Come enjoy fun-filled days of hands-on STEM activities in the mornings followed by afternoons of summer games. STEM is a hands-on learning approach with the idea of educating students in four specific disciplines-science, technology, engineering and mathematics. It is also known sometimes as STEAM with the addition of the arts. We will be building an arcade in the science room, designing obstacle courses, and completing STEM challenges during the mornings. In the afternoons, we will be running, playing, and participating in various games and water activities.
